DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Kanji et al. (Japan Publication NO. 2002-203657).

Kanji et al. discloses an electrostatically atomizing device 1 comprising: a capillary carrier having a liquid collecting end 31 and a discharge end opposite the liquid end, a first electrode 2 associated with the discharge end, a second electrode 3 opposite the discharge end, a voltage source 4 (see figure 5), a steam supply 21 to provide steam for the capillary carrier (see figure 4), a partition 5 for separating the condensation compartment (outside partition 5) and discharge compartment (inside partition 5), a fan 7, and an air duct 6 (see figure 4).

Allowable Subject Matter

3. Claims 3, 4, and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to an electrostatically atomizing device: Marks, Kelly, and Noakes et al.
